

EYECHECKUP MANAGEMENT SYSTEM MANUAL

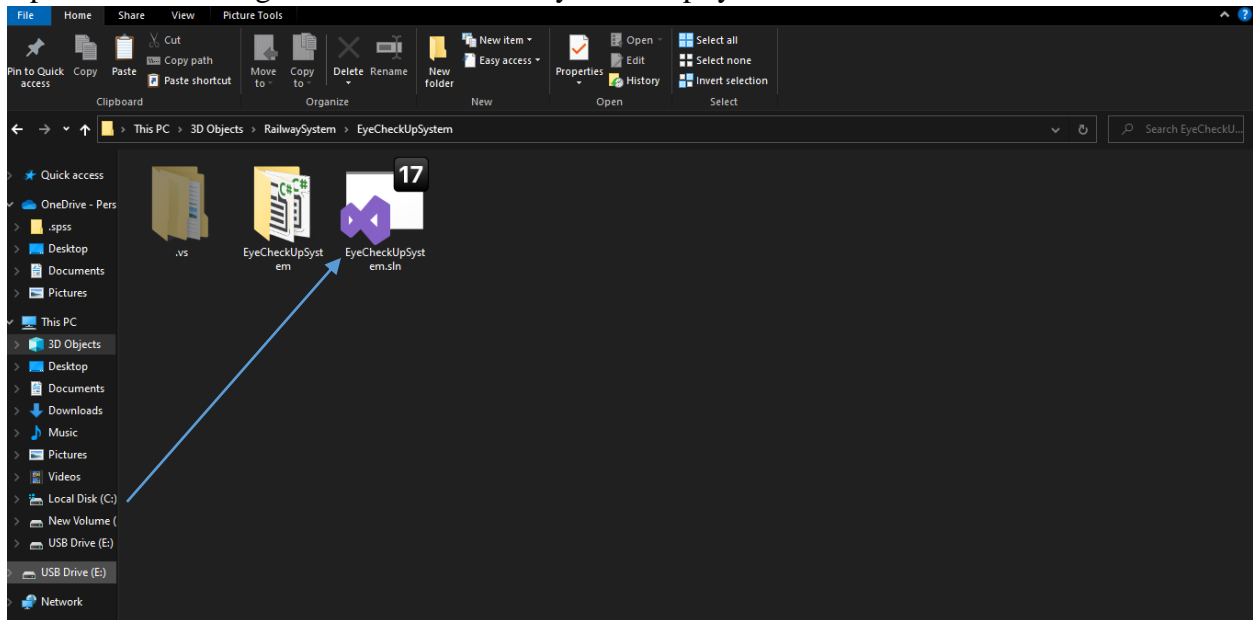

Step One

Download the zip file.

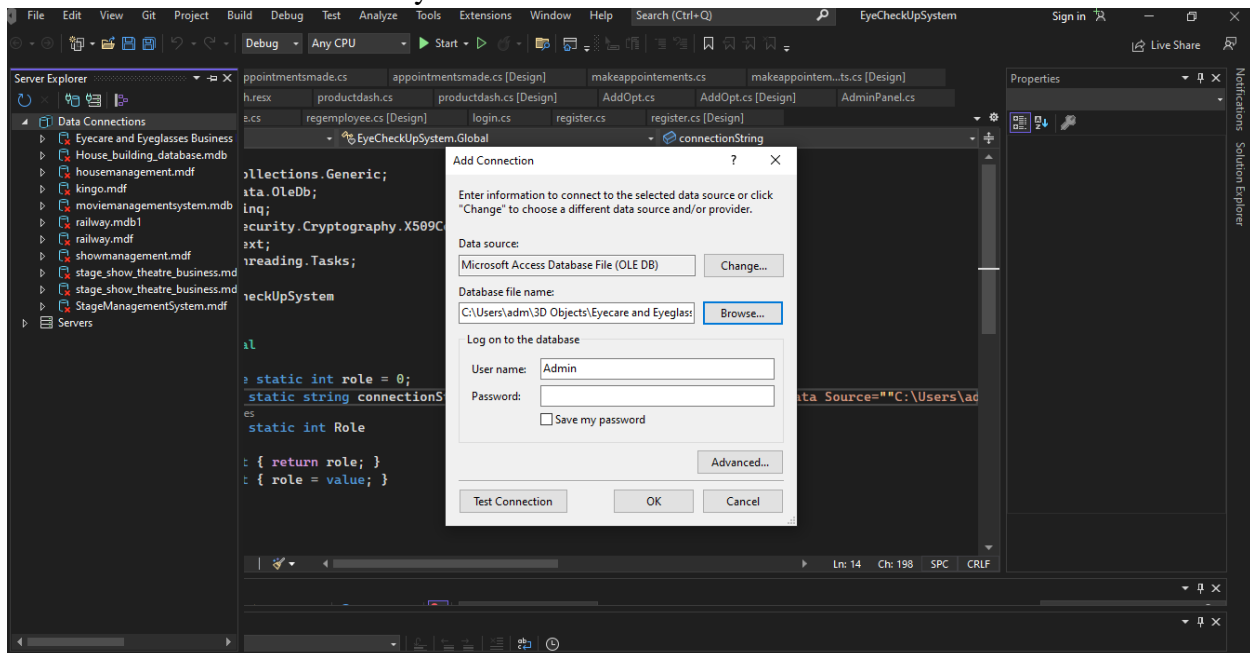

Unzip the file, it's called EyeCheckUpSystem files

Step Two

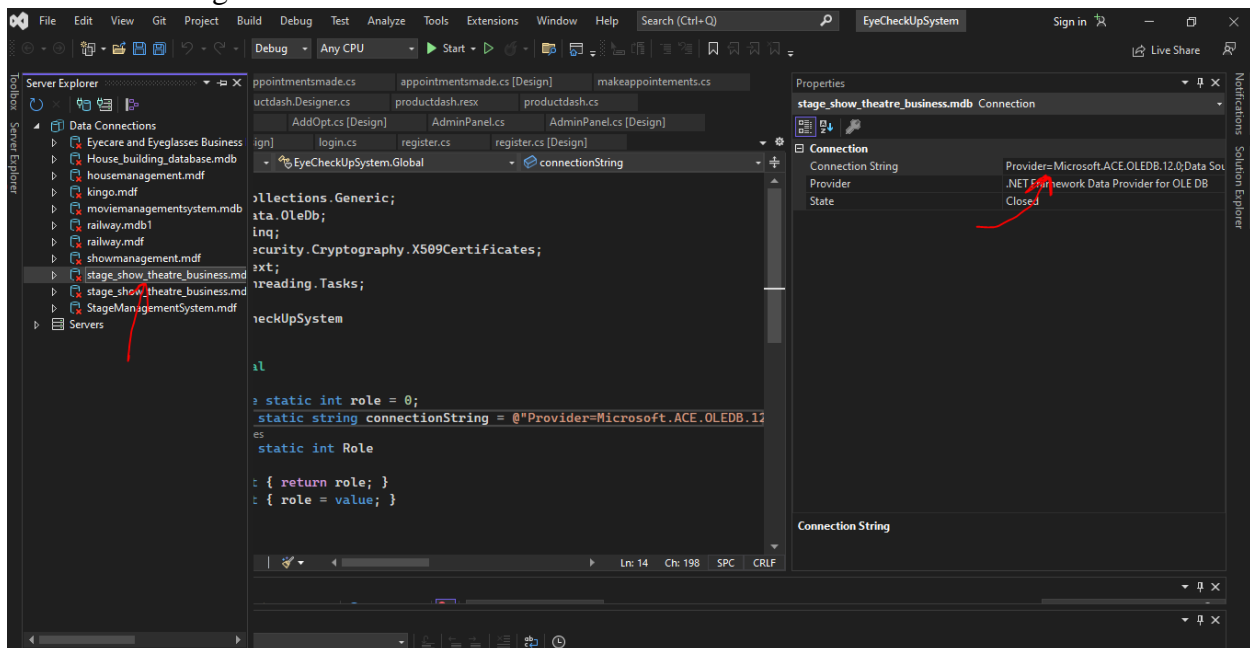

Open the file and right the file written as EyeCheckupSystem.sln

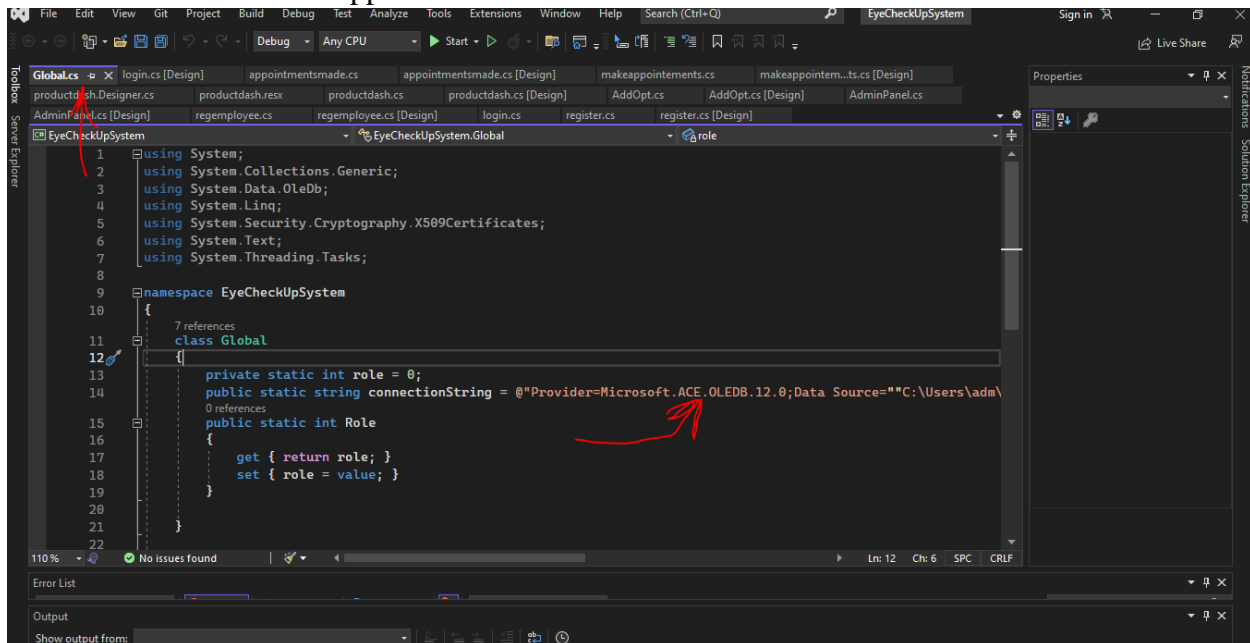

Load the database file into the system.

Right click on the database file once it has loaded and the connection is successful, to get the connection string.

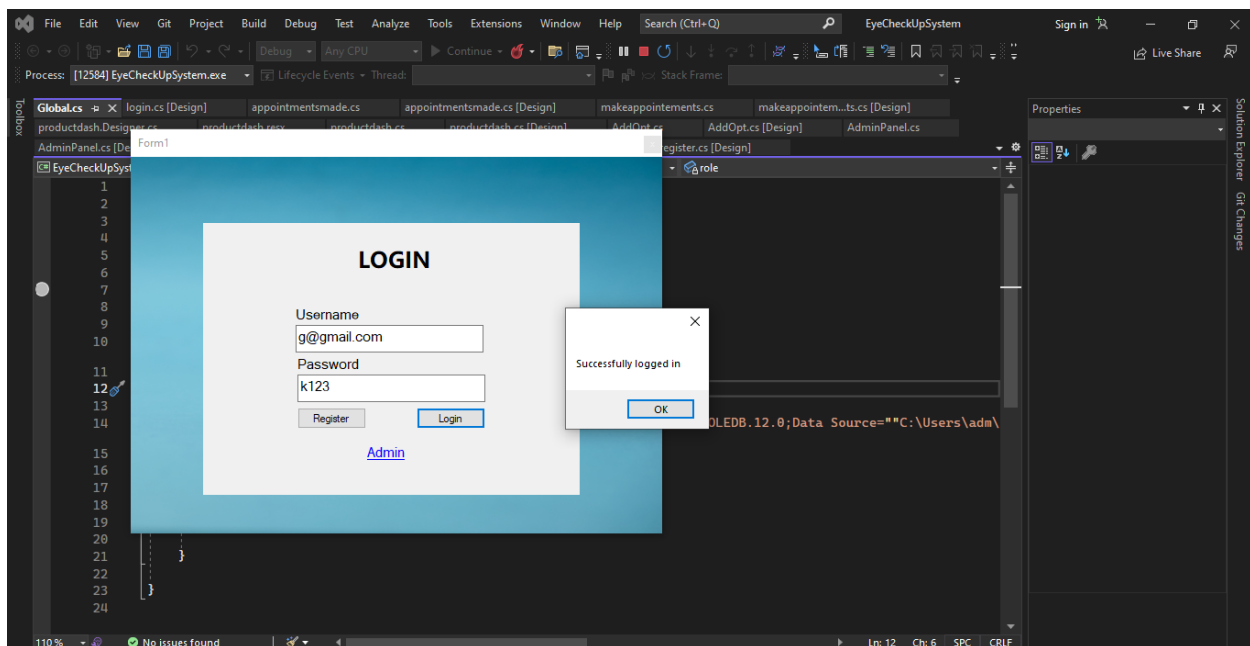

Copy the connection string and use it the global.cs class, this enables the application to connect to the whole forms in the application.

```
1 using System;
2 using System.Collections.Generic;
3 using System.Data.OleDb;
4 using System.Linq;
5 using System.Security.Cryptography.X509Certificates;
6 using System.Text;
7 using System.Threading.Tasks;
8
9 namespace EyeCheckUpSystem
10 {
11     7 references
12     class Global
13     {
14         private static int role = 0;
15         public static string connectionString = @"Provider=Microsoft.ACE.OLEDB.12.0;Data Source='C:\Users\adm\...';
16         public static int Role
17         {
18             get { return role; }
19             set { role = value; }
20         }
21     }
22 }
```

Login in the application

You can now do the appointments and buy eyewear.
